9/8/17

To Our Valued Customers,

Hurricane Harvey and its aftermath have caused unprecedented damage and flooding in Texas and Louisiana resulting in a State Of Emergency in both states and beyond. Most of our resin-based vendors have declared Force Majeure and are currently shut down. This will significantly affect both availability and pricing for many resin-based products, including but not limited to, ABS pipe and fittings, PVC/DWV pipe and fittings, poly pipe and plastic gas pipe. Additionally several of our non-resin vendor partners who have manufacturing/warehouse operations in the region have been similarly impacted.

**Until we receive more information from our affected vendors, existing quotes for their products are null and void. Any new quotes will be good for 5 working days and subject to availability. We will do our best to honor orders that follow your normal purchasing patterns for immediate will-call or delivery.**

We apologize for any inconvenience. Know that we will make every effort to keep you updated on changes.

Our thoughts and prayers go out to all impacted by this tragic event.
